

- > -1 ... 100 bar
Port size: G1/2
- > Microswitch with gold plated contacts
- > Intrinsically safe operation
- > **Electrical connection:**
connector acc. to DIN EN 175301-803 (form A) or cable gland

Technical features

Medium:

For neutral, aggressive, non-inflammable gases and fluids

Operating pressure:

-1 ... 100 bar (-14 ... ??? psi)

Repeatability:

±1% of final value
(depending on regulating pressure)

Port size:

G1/2

Media viscosity:

Up to 1000 mm²/s

Sealing:

≤10⁻⁷ mbar · l · s⁻¹

Pulsations:

Not permitted

Switching pressure

difference/hysteresis:

Fixed or adjustable

Switching cycles:

20/min maximum

Life cycle of mechanical parts:

10⁷ switching cycles

Switching element:

Microswitch with gold plated contacts

Shock-/vibrations (to avoid if possible):

4 g max. (sinusoidal) / 5 Hz max.

Mounting position:

Optional

Degree of protection:

IP65 for DIN EN 175301-803 (DIN 43650) form A connection

IP66 with cable gland

Electrical connection:

DIN EN 175301-803 (DIN 43650) form A or cable gland

Weight:

See table below

Ambient/Media temperature:

Ambient:

-25 ... +80°C (-13 ... +176°F)

Media:

-10 ... +100°C (14 ... +212°F)

Air supply must be dry enough

to avoid ice formation at

temperatures below +2°C (+35°F)

Materials:

Housing: aluminium diecast

Sensor: stainless steel

Sealing: stainless steel-bellows

Technical data

Standard models — 181xxxx (fixed switching pressure difference)

Electrical connection acc. to DIN EN 175301-803, form A

Symbol	Pressure range *1)		Over pressure *2)		Switching pressure difference				Weight		Model

	5 ... 63		85		1,0		2,0		1,1	2,4	1811915

Connector is not in scope of delivery; special pressure ranges on request

*1) Setpoints should be ideally in the middle of the switching pressure range. Reference pressure = atmospheric pressure. Switching pressure must not exceed the indicated values.

*2) Short-term pressure peaks are not allowed to exceed this limit value during operations. Operative utilization of the limit value is not permitted. The limit value corresponds to maximum testing pressure.

Standard models – 180xxxx (adjustable switching pressure difference)

Load level	Current type	Load type *2)	U min [V]	Max. permissible persistent current I _{max} [A] at U *1)				Electrical life-time
				M20 x 1,5 30 V	DIN EN 175301-803, form A 48 V	60 V	125 V	
Standard *3) (contractors, solenoids)	a.c.	Ohmic	12	0,1	0,1	0,1	0,1	≥ 2 x 10 ⁵ Switching cycles
	a.c.	Inductive, cos φ ≈ 0,7	12	3	3	3	3	
	d.c.	Ohmic	12	5	1,2	0,8	0,4	
	d.c.	Inductive, L/R ≈ 10 ms	12	3	0,5	0,35	0,05	
Minor *4) (electronic circuits)	a.c.	Ohmic	5 *5)	0,1				
	d.c.	Inductive, L/R ≈ 10 ms	5 *5)	0,1	0,01			

Reference number: 20/min, Reference temperature: +20°C.
Spark quenching with diode with DC and inductive load:
I_{min} = 1 mA; I_{max} = 1,5 x I_{max} of table
Creepage and air paths correspond to insulation group B according to VDE Reg. 0110 (except contact clearance of microswitch).

*1) Higher currents (5 A max) will cause a reduction of the durability of the micro-switch contacts. Furthermore additional measures has to be taken to fulfil the EMV regulation 2004/108/EG by the manufacturer
*2) Spark quenching/overload protection will be necessary using inductive loads.
*3) Gold-plating not required as it would decay.
Max. perm. in-rush current (appr. 30 ms) I_{AC} = max. 15 A
*4) Gold-plating required (will not decay).
*5) Lower value of critical voltage guarantees sufficient contact safety.
Lower voltages permissible under favourable conditions.

Recommended circuit
Spark quenching and EMV intrinsically safe

- Diode D in parallel to inductive load.
Observance of correct polarity (positive pole to cathode).
Dimensioning specifications for quenching diode:
Rated voltage at diode: $U_D \geq 1,4 \times U_s$
Rated current at diode: $I_N \geq I_{Load}$
Selection of a quick switching diode (recovery time $t_{rr} \leq 200$ ms)
- RC link in parallel to load in parallel to switching contact.
Dimensioning principles:
 R_L in $\Omega \approx 0,2 \times R_{Load}$ in Ω
 C in $[\mu F] \approx I_{Load}$ in [A]

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under

»Technical features/data«.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems or other applications not within published specifications, consult IMI NORGREN.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
